SKILLS

Programming Languages : Bash Scripting, Python, C, C++, C#, SQL, Vue.js, Solidity (Smart Contract)

DevOps & Infrastructure : Azure DevOps (TFS), GitLab CI/CD, SonarQube, Git, Docker, Kubernetes, Ansible, Nginx, Prometheus, Grafana, ELK, Zabbix, Kafka, Zookeeper, ActiveMQ, Sonatype Nexus, Harbor, VMware vSphere/ESXi, Veeam

Robotics & Embedded : Raspberry Pi, Arduino

Spoken Languages : English (Fluent – TOEFL iBT 104/120), Spanish (Proficient)

EXPERIENCE

Fanap Infra
May 2025 – Present

DevOps Engineer
Tehran, Iran

- Built and maintained **CI/CD pipelines and infrastructure automation** for **550+ production services** across **33 clusters**, **1,400+ VMs**, and **590 Kubernetes deployments** spanning 17 environments (dev, sandbox, production, disaster recovery)
- Upgraded production **GitLab from 16.0.1 to 19.2.7** (15+ version hops across 3 major releases) with only **90 minutes of downtime**: cloned production onto a second node, upgraded the clone while the original stayed live, synced changes made in the meantime, then cut over by swapping IPs(kept the pipelines that ran during the upgrade)
- Maintained **GitLab CI/CD** pipelines for banking-critical infrastructure; replaced the legacy CentOS 7 runner host with new **GitLab Runners on Debian 12**, installed offline in an isolated environment and re-registered with matching tags so existing pipelines carried over unchanged
- Provisioned production servers with **Ansible**; administered artifact repositories (**Nexus, Harbor**) and **Nginx** reverse proxy configurations, standardizing infrastructure and service exposure across teams
- Engineered and operated distributed systems (**Zookeeper, ActiveMQ**) supporting mission-critical banking workloads, including user access, encryption/certificate management, and fault handling
- Built centralized logging (**ELK**: Filebeat, Elasticsearch, Kibana) and monitoring/alerting (**Zabbix, Grafana**) across hundreds of services, cutting incident triage time and safeguarding uptime for regulated, high-availability banking systems
- Maintained **24/7 on-call** coverage under strict SLAs; designed and tested **disaster recovery** procedures for critical services, ensuring rapid failover and business continuity

Shenasa (Chainova Studio)
Mar 2022 – Apr 2023

System Administrator
Tehran, Iran

- Administered core databases (**PostgreSQL, MongoDB, SQL Server**) and deployed startup client products to production servers
- Set up and maintained internal tooling (Confluence, Jira) and VPN infrastructure to support secure collaboration across teams
- Implemented backup and recovery processes using **Veeam**, protecting production data across client environments

Blockchain Researcher

- Researched blockchain architectures based on UTXO design and Hyperledger frameworks (Fabric, Sawtooth) to evaluate their fit for emerging use cases
- Explored and prototyped blockchain-based solutions, including decentralized exchange (DEX), Wallet-as-a-Service (WaaS), and blockchain voting systems

Hasin Group
Dec 2020 – Sep 2021

Back-end Developer
Tehran, Iran

- Developed and maintained four production REST API services for a banking client using a **microservices architecture**, with a focus on reliability and horizontal scalability
- Built a reusable **microservices chassis**, giving future microservices a standardized foundation instead of rebuilding shared infrastructure from scratch

EDUCATION

Amirkabir University of Technology 2019 – 2024
B.Sc. Computer Engineering Tehran, Iran

Salam Resalat High School 2016 – 2019
High School Diploma, Mathematics and Physics Tehran, Iran

LEADERSHIP & VOLUNTEERING

Head of Public Relations 2020 – 2023
Students' Union Council, Computer Engineering Dept., Amirkabir University Tehran, Iran

- Elected by student majority; led communications and digital engagement for the department through the onset of COVID-19, launching new platforms to keep students connected during lockdowns
- Organized virtual events despite pandemic restrictions and sanctions; supported freshman onboarding; continued volunteering as department photographer/videographer after stepping down from the formal role

Programming Instructor Summer 2023
Salam Resalat High School Tehran, Iran

- Volunteered to teach CS fundamentals to sophomores and juniors: algorithm design with pseudocode, programming principles, computer architecture basics, and practical coding in C++

AWARDS & COMPETITIONS

8th place – EMIT 2024, Blockchain & Solidity Smart Contract Hackathon
2nd place (Certified) – Tech Olympics 2024 National Competitions, League: Data Processing (Team: Khiariño)
2nd place (Certified) – RoboCup Iran Open 2018 International Competitions, League: Rescue Virtual Robot (Team: Echoic)
